THE CHALLENGE

Reaching Custom Home Buyers in a Niche Market

UrCovered Construction builds custom homes and barndominiums in the middle Tennessee area. The barndominium market is a growing niche with high search volume but also high

irrelevant traffic — people searching for barndominium loans, pre-built kits, and DIY plans rather than custom construction services. They needed a Google Ads strategy that could reach qualified buyers while filtering out the noise.

THE STRATEGY

Dedicated Barndominium Campaign with Precision Negatives

We created a dedicated barndominium campaign alongside the general custom home campaign, allowing separate budgets, bidding, and keyword strategies for each service line. Exact match was used for full-length terms and phrase match for root keywords, following a 60-40 to 70-30 ratio between general and specific keywords.

A comprehensive negative keyword list excluded irrelevant searches — 'Morton barn homes,' 'barndominium construction loans,' and DIY-related terms — ensuring ad spend reached only homeowners ready to hire a builder. Sitelinks were added to improve click-through rates and drive users to relevant landing pages.

60

Total Conversions

Up 45 from the prior period — a 300% increase in qualified leads.

26.9K

Impressions

Up 23,400 impressions as campaign visibility expanded significantly.

1.51K

Total Clicks

Up 1,270 clicks from the prior period through improved targeting.

\$239

Cost Per Lead

Down \$215 from the prior period — a dramatic reduction as campaigns matured.

300%

Lead Volume Growth

With custom homes in middle Tennessee ranging from \$500,000 to over \$1 million and barndominiums from \$200,000 to \$500,000, each \$239 lead has extraordinary revenue potential. By creating a dedicated barndominium campaign with precision negative keywords, we grew lead volume 300% — from 15 to 60 qualified inquiries from homeowners ready to build.
